EDUCATION

Dayananda Sagar College of Engineering, Bangalore CGPA: 9.11/10

2022 – 2026

Bachelor of Engineering – Artificial Intelligence and Machine Learning

TECHNICAL SKILLS

Languages/Technologies: Bash/Shell scripting, Go, Python, Terraform, Ansible, C/C++

Cloud & IaC: AWS (EC2, EKS, ECS, S3, RDS, IAM, VPC, CloudWatch, Route 53), GCP, Azure, Terraform cloud

Containers & CI/CD: Docker, Kubernetes (AKS, EKS, kubeadm), Helm, ArgoCD, GitOps, Jenkins, GitHub Actions, NGINX

Observability & Security: Prometheus, Grafana, Loki, Alloy, EFK Stack, Alertmanager, SonarQube, Trivy, OPNsense, VPN

Networking: Load Balancing (NGINX, ALB), VPC, Subnetting, Firewall rules, CDN, Cilium, Istio

On-Premises & Infra: Proxmox, Coolify, Linux VPS, bare-metal provisioning, metalLB

Datastores: PostgreSQL (RDS), MongoDB, Redis, DynamoDB, S3

EXPERIENCE

Valura.AI

Jan 2026 – Present

DevOps Engineer : Terraform, AWS-to-On-Prem, Proxmox, HashiCorp Vault, Security Hardening

- **Leading end-to-end DevOps** for Valura's upcoming product launch – architecting and owning deployment pipelines across **IMT and UAE regions**, ensuring geo-redundancy, compliance readiness, and zero-downtime release strategy.
- Achieved **45% dev infrastructure cost reduction** by migrating development servers from AWS to on-premises (Proxmox + Coolify on hardened Linux), maintaining full environment parity throughout.
- Executed **conflict-driven production evacuation** (ME-Central-1 → AP-South-1) via Terraform IaC + Bash under live geopolitical pressure – **sub-15-min downtime**, full restoration within 48 hours.
- Centralised **300+ secrets** in HashiCorp Vault (**90% exposure reduction**); SonarQube gates cut vulnerabilities **30–50%**; OPNsense IDS/IPS + VPN deployed.
- Instrumental in achieving **ISO 27001 certification** – hardened infrastructure controls, enforced audit logging, and implemented security policies aligned with compliance requirements.

TOINGG

Jun 2025 – Jan 2026

DevOps Intern : Terraform, AWS, GCP, Docker, Kubernetes, GitHub Actions, Prometheus, Grafana

- Designed **multi-cloud architecture (AWS + GCP)** using Terraform – serverless stacks (Cloud Run + Lambda), IaC-driven workflows, achieving **90% reduction** in monthly infrastructure spend.
- Engineered **high-throughput data pipeline** handling **6,000+ records/run** – async processing, intelligent batching, and workload parallelisation delivered **85% faster scraping cycles**.
- Embedded **SonarQube + Trivy** in CI/CD pipelines as automated quality gates – boosted code quality **65%**, eliminated **80% of critical vulnerabilities** across multiple services.
- Collaborated with cross-functional engineering teams to drive **GitOps adoption** – standardised deployment workflows and reduced environment-related incidents across dev, staging, and production.

PROJECTS

DevOps Infrastructure Hub (Self-Hosted) [\[Live\]](#) [\[GitHub\]](#)

2024 – Present

Kubernetes, kubeadm, ArgoCD, Jenkins, Prometheus, Grafana, NGINX, cert-manager, GitOps

- Self-hosted **2 node production-grade Kubernetes cluster** (kubeadm on Linux VPS) serving 5+ live apps at **99%+ uptime**; GitOps CI/CD via ArgoCD + Jenkins with zero-touch deployments and auto-rollback.
- Deployed **Istio** service mesh + **Cilium** CNI with automated TLS (cert-manager); enforced RBAC + network policies; centralised monitoring via **Prometheus + Grafana + Loki + Alloy** across all namespaces.

Agent Nexus – 6-Agent RAG System on Bare Metal k8s [\[GitHub\]](#) [\[Blog\]](#)

2025

Cilium, Istio, MetalLB, cert-manager, Prometheus, Kiali, Kubernetes, eBPF

- Productionised a **6-agent RAG pipeline** on 2-node bare-metal k8s using **Cilium** (eBPF, kube-proxy replacement) + **Istio** STRICT mTLS; resolved Cilium eBPF vs Istio iptables interception conflict via socketLB tuning.
- Deployed **MetalLB** (Layer 2) for on-premise VIP, **cert-manager** for automated TLS, and **Kiali** + Prometheus for zero-instrumentation live service topology.

CERTIFICATIONS AND ACHIEVEMENTS

CKAD – Certified Kubernetes Application Developer, Linux Foundation / CNCF (2024) [\[Credly\]](#)

Terraform Associate – HashiCorp Infrastructure Automation Certified (2024) [\[Credly\]](#)

GSSoC 2024 – Peak Rank **#1** of 30,000+ contributors; ranked **35th overall**; 90+ merged PRs across 50+ open-source repos

Published & Patented – WAUTO DISPENSE, ICMET International Conference (2024)

ISRO Bhuvan Internship – Selected to work on the India's indigenous geospatial platform (2025)
